Additional Information (to facilitate the application process, please submit a copy of the study plan or proposal): _____

Signature of Applicant

Date

COLLECTING PERMIT APPLICATION DIRECTIONS

1. Fill in all blank spaces. Each person must give their Date-of-Birth and Social Security Number for an Idaho Department of Fish & Game violation check. Also give your middle initial. This clarifies "same name" confusion.
2. Send application(s) to the Idaho Department of Fish & Game Headquarters Office. Your application(s) will be routed to the appropriate bureau(s) for comments and approval or disapproval. DO NOT send the application(s) to the Region offices.
3. ALLOW UP TO SIX WEEKS FOR PROCESSING. Do not expect the permit to be issued on short notice.
4. A report will be required upon completion of work or upon expiration of a current permit. **No renewal permit will be issued until a current and complete report of work is on file with the Department.**

PUBLIC INFORMATION SHEET
Policies, Procedures, and Conditions
for granting Scientific Collecting Permits

Granted by the Idaho Department Of Fish and Game
under 36-106 e.5 (Idaho Code)

Policies

1. A permit, as provided by law, is required to band, collect, possess, sell or trade any fish or wildlife in Idaho. A valid hunting, fishing, or combination hunting and fishing license is required to kill any fish or wildlife in Idaho.
2. Unprotected and Predatory Wildlife may be taken in any amount, at any time, and in any manner not prohibited by state or federal law, by holders of the appropriate valid Idaho hunting, trapping, or combination hunting and fishing licenses, or a valid permit, provided such taking is not in violation of state, county, or city laws, ordinances, or regulations. Predatory Wildlife includes the coyote, jackrabbit, weasel, skunk, and starling.
3. No permit may be granted for commercialization of fish and/or wildlife.
4. No permits will be issued allowing the use of explosives by non-Department personnel.
5. A Scientific Collecting Permit will NOT be valid for the transfer of live fish or eggs. This must be specifically authorized by the Department using a Live Fish Transport Permit.
6. Only species listed on the permit may be collected. No species classified as Threatened, Endangered or Species of Special Concern may be collected unless specifically listed on the permit.
7. No "blanket" permits will be issued for all capture methods on a statewide basis.
8. Any person convicted of, who receives withheld judgment for, or forfeits a bond for, a violation of Title 36, Idaho Code, will not be issued a permit for a period of at least one year from the date thereof. Any fish or wildlife under possession will be forfeited to the Idaho Department of Fish and Game at the time of conviction, judgment, or forfeiture.
9. No permit will be issued to any individual whose hunting and/or fishing privileges have been revoked, until he/she is again eligible to purchase a hunting or fishing license.
10. Violation(s) of the permit will be reviewed for potential violation of Idaho Code. If a specific violation has occurred, the individual will be cited under authority granted to the Department.
11. No permit issued by the Department for a species requiring an additional federal permit shall be valid unless it is accompanied by said federal permit.

Procedures

1. The application for permit must be accompanied by a justification statement specifying:
 - a) A specific project proposal or study plan (if applicable).
 - b) The specific need to collect, band, or possess such wildlife, and the species (include scientific names) and number of individuals needed.
 - c) The proposed method(s) of capture.
 - d) The approximate number and proposed disposition of specimens which are killed during sampling.
 - e) The minimum area in which it is feasible to capture, band, or collect the animals.
 - f) The minimum amount of time necessary to conduct the activity.
 - g) The name, social security number, date-of-birth, and qualifications of the person(s) to be named on the permit.
2. The application must be submitted a minimum of twenty (20) days prior to the proposed starting date.
3. The application should be submitted to the Wildlife Bureau at the Headquarters Office in Boise. All permits must be reviewed and approved by the Wildlife Bureau, the Bureau of Enforcement, and the appropriate Region(s).

Standard Conditions

1. The permit will be immediately revoked if the applicant violates any provision of the permit.
2. A report must be submitted within 30 days after expiration of the permit. The report will include the date, Regional office employee notified, place of sampling, numbers and species of specimen captured, and the disposition of the specimen. A signed receipt, listing the foregoing information on any samples killed, must accompany the report. No additional permits may be granted until the report is received and accepted by the Department. No wildlife in possession may be released back into the wild without prior Department approval.
3. If requested by the Department, a copy of the final report, of which the collection done under this permit is a part, must be furnished to the Department free of charge.
4. The permit must be in the immediate possession of the named individual or sub-permittee(s) when that person is exercising the privileges granted by the permit.
5. The permit is not transferable, nor may its authority be delegated to any other individual(s).
6. Rabies shots and adequate training/experience are required to capture and handle bats.
